

**PRODUCT TYPE**

RENSA TERRACE is a very efficient detergent for washing of wooden terrace floors and garden furnitures before wood oil treatment. It removes dirt, mould, algae growth and other impurities that prevent the wood oil from absorbing to the surface.

**USAGE**

RENSA TERRACE can be used on all wooden surfaces which endure cleaning with water and will be treated with wood oils, wood stains or exterior paints for wooden surfaces. RENSA TERRACE is strongly alkalic detergent, which mattens painted surfaces. It can also be used for pre-treating very dirty and chalked painted surfaces before maintenance painting.

RENSA TERRACE is environmentally friendly and biodegradable. It meets the requirements by OECD and by the Detergent regulation of European Parliament and the Council on detergents for biodegradability (OECD 301B, EC 648 / 2004).

**TECHNICAL DATA****pH**

abt. 14

**Dilution**

For washing of and pre-treating surface to be painted: 1 : 1 (1 litre of detergent to 1 litre of water)  
For very dirty surfaces: Undiluted.

**Spreading rate**

abt. 10 m<sup>2</sup> / 1 l undiluted detergent.  
Absorption of the surface, dirtiness, air humidity etc. factors affect considerably on the spreading rate.

**Packages**  
(availability varies by country)

1 L, 5 L

**SAFETY MARKINGS**

See Safety Data Sheet.

---

**DIRECTION FOR USE**

Dilute RENSA TERRACE with water depending on the purpose of its use:  
For washing of and pre-treating surface to be painted: 1 : 1 (1 litre of detergent to 1 litre of water)  
For very dirty surfaces: use undiluted.

Wet wooden surfaces with water before applying the detergent. This prevents the detergent from absorbing too much and drying too fast.

Apply the detergent to the surface to be cleaned by using e.g. a brush or low-pressure spray (so-called garden spray). NB! Avoid splashing – the detergent may damage painted surfaces. Let it act for abt. 5 minutes. Enhance the cleaning effect by brushing. When the detergent has acted, it creates a slippery surface. The detergent must not dry on the surface to be cleaned - wet the surface again with the washing fluid, if needed.

If the dirt has got very embedded, a second treatment with RENSA TERRACE might be needed.

Rinse the surface thoroughly with clean water. When using a pressure washer avoid excessive wetting of the wooden structures, such as weatherboards and outer walls.

Let the surface dry for about 24 hours before painting or other treatment.

**Protection**

RENSA TERRACE is an efficient, but environmentally friendly and biodegradable product.

However, using the detergent must be followed with caution.  
Avoid skin contact and breathing the spray mist. **Protect eyes from splashes.**  
More information from product's Material Safety Data Sheet: [www.teknos.fi](http://www.teknos.fi)

The detergent does not harm garden plants, but avoid unnecessary splashing. The most sensitive plants can be covered or wetted with water before the treatment.

The detergent mattens or bleaches surfaces that are washed - avoid unnecessary splashing.

**ADDITIONAL INFORMATION** MUST NOT FREEZE.
