

Interior wood stains and lacquers colour card

We have chosen 30 translucent colours to this colour card. The final appearance of translucent colours is always affected by the colour and porosity of timber as well as number of coats applied and gloss grade of the product.

Always make a test application before the final choice of colour.

Note!

Colours displayed on the screen have been produced electronically. They do not replace the real colour samples, as the perception of colour is affected by the surface and gloss of the material, as well as lighting. Always select the final colour from the colour cards in the surroundings and conditions in which the colour is going to be used.
