WOOD COATINGS

Passion for wood

CETOL® WF 98xx range

The various different products of the CETOL® WF 98xx range from Sikkens Wood Coatings deliver better performance and excellent durability from a single platform.

This translucent range of waterborne single pack top coats for wooden windows, doors and claddings are suitable for all kinds of woods and provide excellent application properties, transparency and high durability.

Available in different gloss levels and appearance, CETOL® WF 98xx products deliver a high quality surface and a great look and feel to any wooden doors, joinery or cladding. They deliver no dirt pick-up and excellent levelling

In this brochure, you'll find all details about the complete CETOL® WF 98xx range – including CETOL® WF 9810-03-xx, CETOL® WF 9810-04-xx, CETOL® WF 9810-46-25 and CETOL® WF 9830-03-05.

If you are looking to achieve long lasting surfaces with top performance, the CETOL® WF 98xx range will help you to deliver the best results ever.

Features

- Excellent transparency
- High body
- Very good application properties
- Adapted to Wood Color Tinting system tinting with Aquaflex
- Low build, emphasizes a natural effect CETOL® WF 9830-03-05

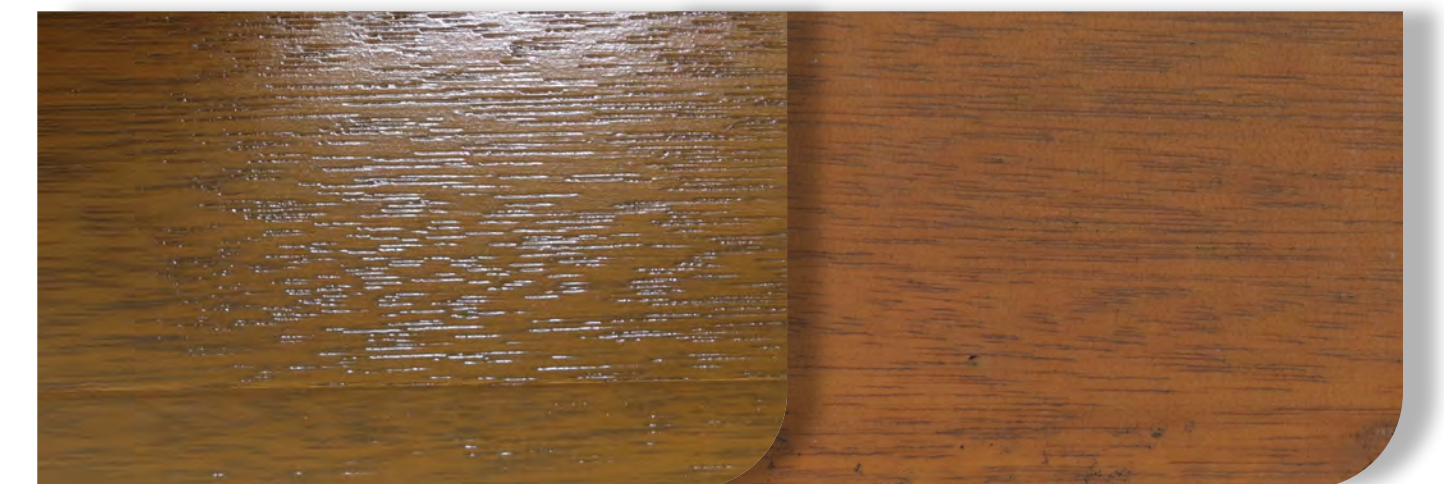

Dirt pick-up test

CETOL® WF 98xx vs competitor

Outdoor durability test

CETOL® WF 98xx before and after 4 years outdoor test

CETOL® WF 9810

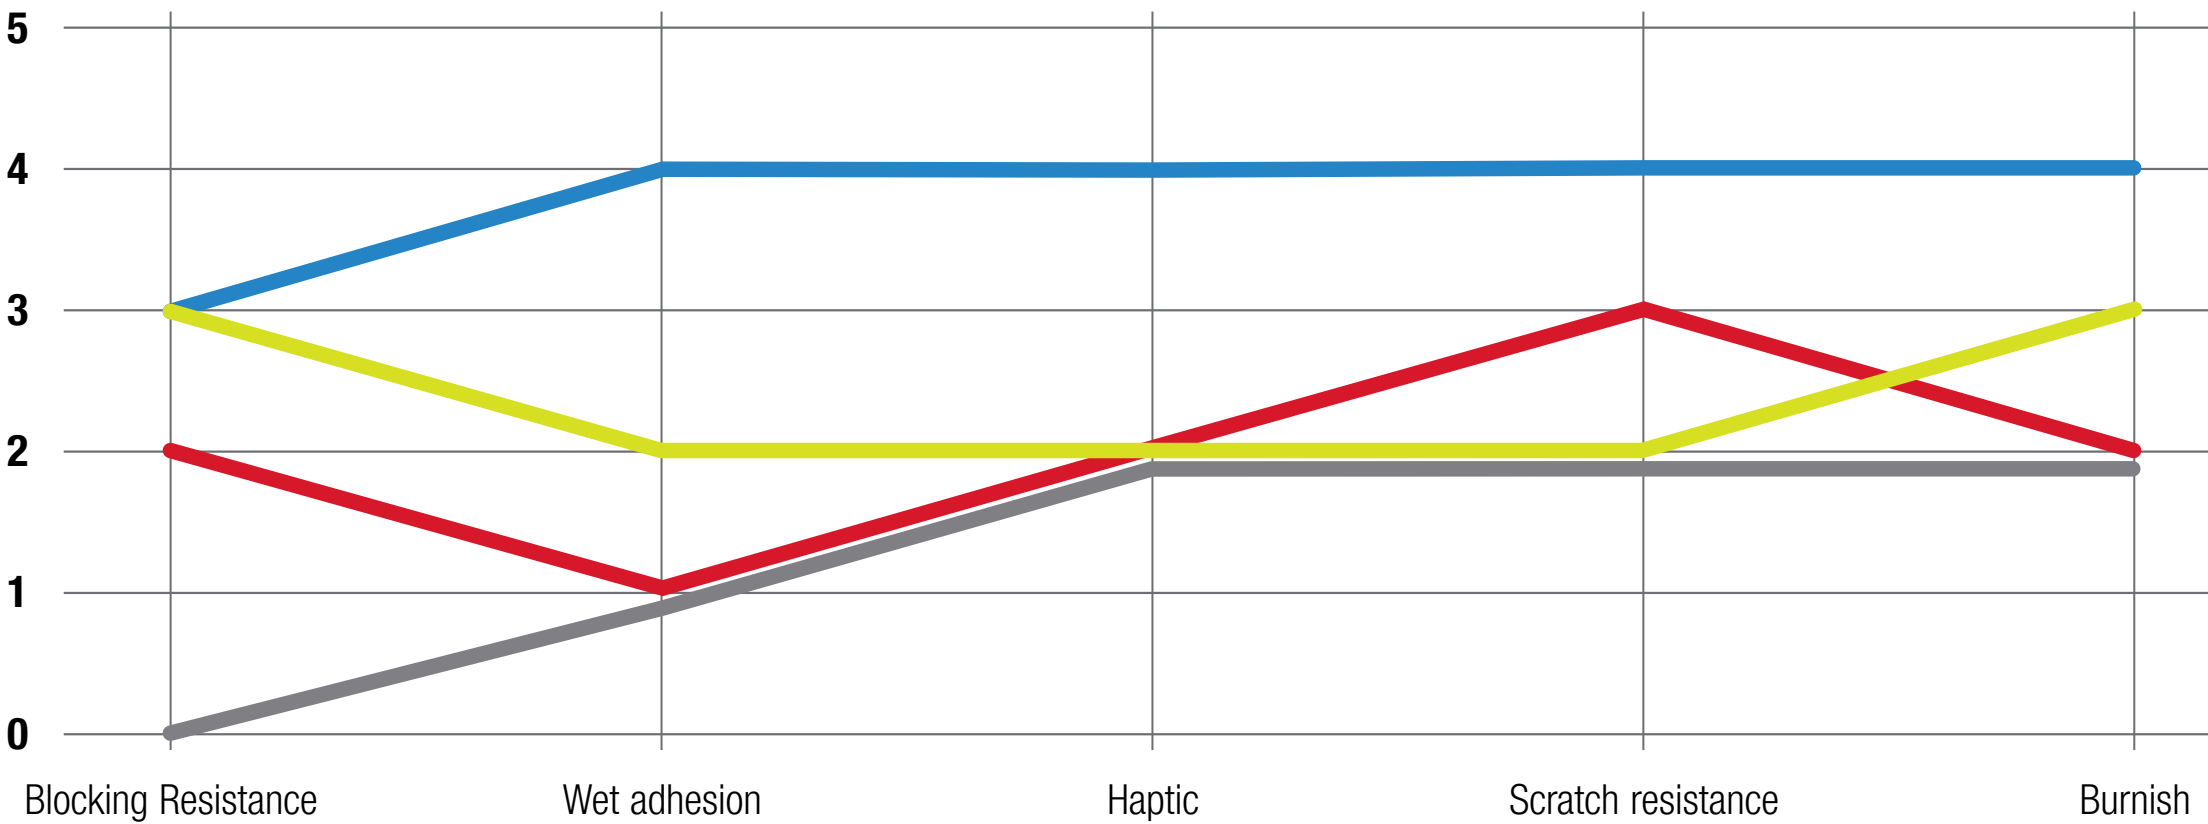

The new CETOL® WF 9810 assortment of translucent products convinced all customers who have tested the different versions on pine and oak.

Best performance for different applications

The spray version CETOL® WF 9810-03-xx with its smooth surface like furniture has a good levelling, less grain raising, fast drying and can be applied up to 300 µm.

The vacumat/brush version CETOL® WF 9810-46-25 has a high build, good levelling, a good pore wetting and can be applied in the vacumat 1-2 times with 100 µm up to 150 µm and in 3 layers by brushing.

Features and Benefits:

Excellent durability with no dirt pick-up

The new CETOL® WF 9810-03-xx, WF 9810-04-xx and WF 9810-46-25 didn't demonstrate any dirt pick-up after the outdoor exposure during our Global Weathering Program. This helps you to convince your customers of a brilliant surface with maximum durability and lifespan.

Spray application up to 300 µm

CETOL® WF 9810-03-xx can easily be sprayed up to 300 µm with a good flow and excellent levelling and a surface smooth as furniture. The less grain raising supports the superior end result.

Brush application up to 150 µm

CETOL® WF 9810-04-xx can be applied 3 times by brush up to 150 µm to produce good levelling. The good pore wetting and the high build of CETOL® WF 9810-46-25 helps to create a great finish. By using a vacumat you can benefit from the same results with 1 to 2 layers.

CETOL® WF 9810

The new CETOL® WF 9810 assortment of translucent products convinced all customers who have tested the different versions on pine and oak.

CETOL® WF 9830-03-05

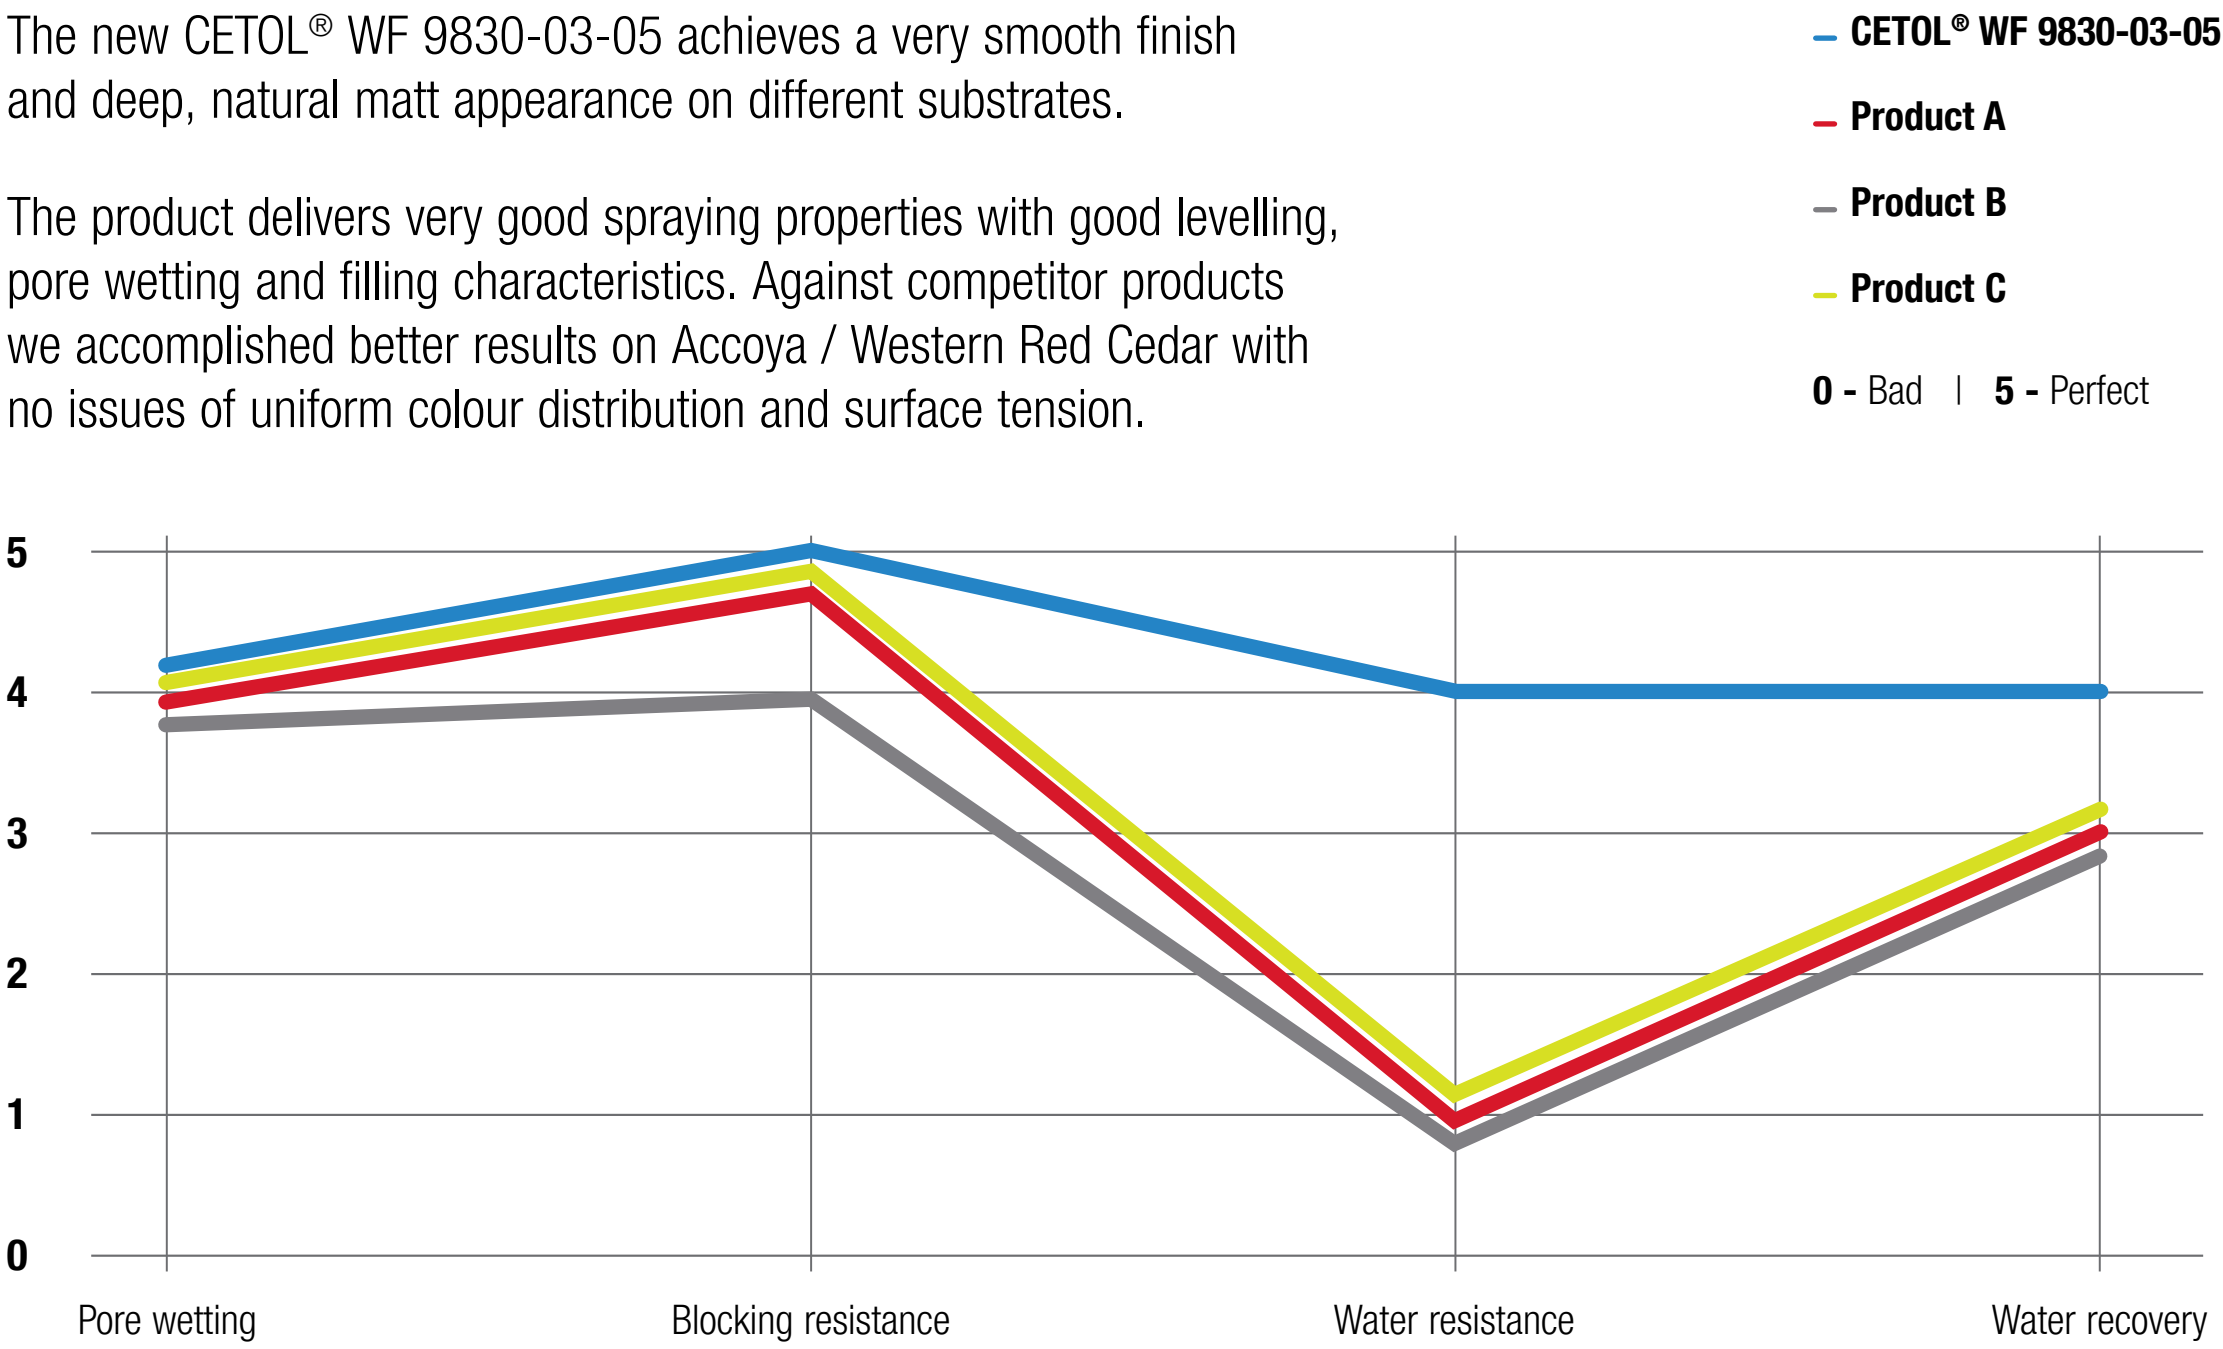

The new CETOL® WF 9830-03-05 delivers a very smooth surface and the deep matt natural look customers desire.

The best natural look and feel

The new CETOL® WF 9830-03-05 achieves a very smooth finish and deep, natural matt appearance on different substrates.

The product delivers very good spraying properties with good levelling, pore wetting and filling characteristics. Against competitor products we accomplished better results on Accoya / Western Red Cedar with no issues of uniform colour distribution and surface tension.

Features and Benefits:

Best results at the water drop test

CETOL® WF 9830-03-05 delivers the best results during our water drop test. At the same time the surface looks like furniture and has a deep matt natural look.

Better appearance with a more natural touch and feel

Our customers tested CETOL® WF 9830-03-05 against several products and found out that the new product delivers the best natural appearance on a surface such as furniture.

CETOL® WF 9830-03-05

The new CETOL® WF 9830-03-05 delivers a very smooth surface and the deep matt natural look customers desire.

Tested to the limit

Proven durability on pine and meranti

Our new CETOL® WF 98xx range has also been undergoing our global weathering program to be exposed for at least two years in different locations. By doing regular parameter checks and visual inspections, we are able to monitor the durability of our systems and every reference sample of our CETOL® WF 98xx range has been satisfying, to ensure a high-quality standard of our products.
