
PRODUCT TYPE	RENSA SUPER is an efficient universal detergent for washing of all kind of building surfaces and for pre-treating surfaces before painting. For in- and outdoor use. RENSA SUPER is an evaporating detergent, which is not necessary to rinse with water. Using the detergent is quick and easy: wipe of the dirt, let it dry for 5 minutes and paint.
USAGE	RENSA SUPER can be used on all paint and constructional surfaces, which endure cleaning with water. RENSA SUPER is environmentally friendly and biodegradable. It meets the requirements by OECD and by the Detergent regulation of European Parliament and the Council on detergents for biodegradability (OECD 301B, EC 648 / 2004).
<hr/> TECHNICAL DATA	
pH	abt. 10
Dilution	No dilution.
Spreading rate	abt. 20 m ² / 1 l detergent. Absorption of the surface, dirtiness, air humidity etc. factors affect considerably on the spreading rate.
Packages (availability varies by country)	1 L, 5 L and 1 L spray bottle
SAFETY MARKINGS	See Safety Data Sheet.

DIRECTION FOR USE

RENSA SUPER is a ready-to-use solution, which is used undiluted.

For slightly dirty surfaces or for objects, where using of water is not possible, the cleaning can be done by RENSA SUPER wiping: moisten a sponge, cleaning cloth etc. with the detergent and wipe the surface clean. The surface can be painted right after the detergent has dried.

When cleaning very dirty or large surfaces use RENSA SUPER as traditional detergents:

Wet porous surfaces, such as untreated wood, plaster etc., with water before applying the detergent. This prevents the detergent from absorbing too much and drying too fast.

Apply the detergent to the surface to be cleaned by using e.g. a brush or low-pressure spray (so-called garden spray). Let it act for abt. 10 minutes. Enhance the cleaning effect by brushing. The detergent must not dry on the surface to be cleaned - wet the surface again with the washing fluid, if needed.

Rinse the surface thoroughly with clean water. When using a pressure washer avoid excessive wetting of the wooden structures, such as weatherboards and outer walls.

RENSA SUPER is an efficient, but user- and environmentally friendly and biodegradable product.

Protection

However, using the detergent must be followed with a reasonable caution. Avoid skin contact and breathing the spray mist. **Protect eyes from splashes.** More information from product's Material Safety Data Sheet: www.teknos.fi

The detergent does not harm painted surfaces or the most usual materials/constructional surfaces, but avoid unnecessary splashing. For the most delicate materials, e.g. textile surfaces, must be ensured efficient protection and suitability of the product by testing the effects on a small, unnoticeable area of the surface to be treated.

The detergent does not harm garden plants, but avoid unnecessary splashing. The most sensitive plants can be covered or wetted with water before the treatment.

ADDITIONAL INFORMATION MUST NOT FREEZE.

The information of this data sheet is based on laboratory tests and practical experience. The figures are for guidance only and depend on, for example, colour and gloss. As we have no control over the use and application conditions, we are only responsible for the quality of the product and guarantee that it conforms to our quality control. We accept no liability for any loss or damage resulting from the application of the product contrary to the directions or the intended use.
